## COOPERATION BAZUS, S.A. – MCS, Inc.

---

The BAZUS Company established in EU as manufacturer of industrial solutions since 1810 and with long tradition in cooperation with good partners and quality companies has reached an agreement with the US Company "Metal Cutting Solutions, Inc." for collaboration, cooperation and distribution of BAZUS products in the US market.

BAZUS is the world leader in cross-tables and slide units supplying to Machine Tools manufacturers (Germany, France, Italy...) and with presence in more than 40 countries all over the world. Innovation, Quality and product development according to customer specifications are the BAZUS working procedure. Drilling, milling, rolling, research centres, welding applications, engraving.... and any industrial application in which the linear movement must be controlled.

MCS Inc. established in Cincinnati (Ohio) with the goal of providing innovative and productive solutions for the metal working industry: a reliable and accurate process is the major key factors for success in the making of quality parts, machine tools, accessories, fixtures and tooling which fit this goal. Besides expertise with industrial machinery and processes, they have extensive experience in supplying spare parts especially for German built machine tools.

With this cooperation agreement both companies increase their capacity to achieve high accuracy and high quality answers for any industrial application. The combination of all know-how creates very positive synergies for customer profit.
